

CD/DVD Mastering

So now you've finished your great project. How are you going to distribute it? It needs to be mastered.

Whether DVD or CD, the mastering process can make or break your final project. The best video, poorly mastered, will not look great. The best audio tracks, not properly sequenced and spaced won't be right. For DVDs, sometimes you don't need menus and all the bells and whistles. We can do a straight drop-down of your video to DVD very inexpensively. And if you want the whole enchilada... we can create custom menus, navigation, chapter stops, motion menus... whatever you need to make your presentation really stand out.

For CDs, we can put your tracks in any order, put the proper gaps between tracks, or create multiple tracks with no gaps for spoken word. Please call us with your mastering needs... we're here to help. If you're looking for VHS or other consumer format conversion to DVD, please see the "VHS to DVD" or "8mm to DVD" sections.
