Solid Gold Video offers two no-linear editing suites. One suite is an all-digital suite while the second suite is a Pinnacle based system with analog and digital input and output. This suite offers Betacam SP, DVCAM, DV, Mini-DV, 3/4" SP, S-VHS, VHS, Hi-8, 8mm and Digital 8.

We can create custom graphics, titles, effects and transitions, and we offer many volumes of stock graphics, motion elements, Digital Juice toolkits, music library and sound effects.

The editing process can make or break your story. Our experienced editors can help you keep the continuity flowing, adding just the right special effects and transitions... only where and when they're needed. Same with sound effects and music. Choosing the right elements and blending them into the final production will go a long way in making your finished video a professional work of art.

Whatever your editing needs, we can handle them here at Solid Gold Video.

Once we finish editing your video, we can master it to the format of your choice... DVD, CD, videotape or web. See our [Mastering page](#) for more info.

If it goes on video, we can produce it at Solid Gold Video. Give us a call so we can show you how we can help you produce that perfect video on a budget that won't break your pocketbook.
