

## Weddings / Social

The wedding video specialists at Solid Gold Video have been creating videos of weddings since the 1970's, so we know how to do it right. We only do a maximum of 2 weddings on any given day to be sure we can give each of our Brides and Grooms the attention they deserve.

Our coverage includes:

Professional digital video coverage, wireless microphones, low light capable cameras so we don't interfere with the ambience of your setting, interviews with your bridal party and family, attention to detail... capturing those special memories such as the cocktail hour, center pieces, flowers and decoration, your grand entrance, first dance, guests plus more. Your finished video will be professionally edited in our digital non-linear editing suites with music, special effects, digital transitions and more.

All our coverage is done in stunning wide-screen. You may not have a wide screen TV today, but you will soon! We help you future-proof your memories.
