

Slides/Photos to DVD

Do you have piles and boxes of pictures laying around your house? How about those albums you haven't looked at in years? Or trays and trays of slides... but no projector? You don't have to set up a screen to watch them anymore.

Solid Gold Video can professionally transfer your pictures and slides to DVD. Now you can even share these great memories with family... no matter where they are!

We professionally transfer your pictures to digital files that are then authored to a beautiful slide show with motion. Pictures are \$.99 each with a one-time \$35 DVD output charge per DVD master (about 400 pictures can fit on one DVD).

Slides are transferred directly to DVD using our special slide telecine that uses a low wattge bulb so your precious slides can't be harmed. The slides are NOT projected. The integrated CCD camera pickup actually focuses directly on the slide itself, so it doesn't add any grain to the image. Each slide is tranferred for 7 seconds. Want to see one slide for a longer time? Just press the pause button on your DVD remote. You can leave the still picture up indefinitely without harming the DVD. Slides are \$.69 each with a minimum of 70 slides. Slides not in carousel compatible trays are \$1.09 each.
